Notes

The row numbers are counting away (South), the column numbers are counting from the left (looking from the meeting house)

The layout of the graves is not truly orthogonal, so the positioning in columns is approximate

The above is all the information given on the gravestones

Where the year has only 2 digits, the leading numbers for it are 19**

This page size is A4 landscape – the two pages sit next to each other for an overall plan of the burial ground
